

# Remote Learning with BlueJeans

Empower instructors to create an effective learning environment by bringing students, content, and teaching resources into a single view.

## Maximize Student Engagement

### **Complete Control**

The Teacher Dashboard is designed to provide a full snapshot of everything that's going on in the learning session, save teachers' time from the administrative duties of online instruction and provide quick access to classroom management tools.

### **Inclusive and Engaging**

Effectively engage students for an exceptional learning experience. Always accessible chat, breakout sessions, participant reactions, intelligent highlights and a multi-participant whiteboard increase opportunities for everyone to engage during a live session.

### **Customizable Layout**

Remote Learning with BlueJeans is flexible, customizable, and enables instructors to create synchronous teaching sessions. Instead of a one-way presentation, these tools allow the entire class and instructor to collaborate effectively.

Unlock remote learning opportunities with an engaging video conferencing experience coupled with a dynamic set of tools to manage and customize your teaching sessions. Whether you are in the classroom or doing online instruction, Remote Learning with BlueJeans focuses on placing the educator at the center of the action and gives them the opportunity to bring their unique style to the learning environment.

## User Scenarios

### K-12/Higher Education

BlueJeans provides every tool that instructors need at their fingertips to run an effective, inclusive, and engaging learning environment and bring their unique style to the class.

### Corporate Learning

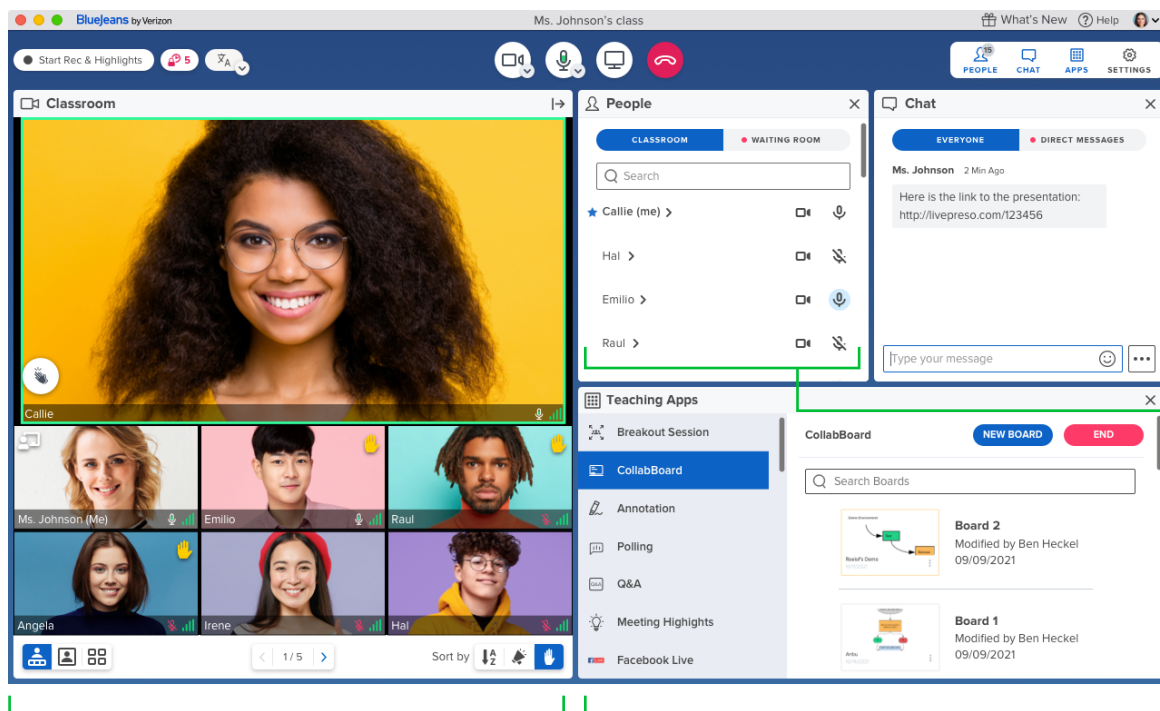

Running an effective corporate learning session that aligns with company goals can be challenging. BlueJeans Remote Learning tools enable businesses to manage impactful training sessions.

### Online Instruction

Whether it's online tutoring or a cooking class, remote learning tools are designed to provide a platform for high quality virtual learning experience.

## Teacher Dashboard

Dashboard allows users to build a custom teaching experience without the overhead of managing a classroom so teachers can focus on teaching.
